Starting with an empty notepad running maximised and status bar disabled, simply to blot-out my desktop

Press and release the <win> key, or left mouseclick the start menu if preferred, the start menu is displayed, no need to focus the cursor anywhere

simply type the letter "D" this is entered into the search field, and the best match of "bluetooth and other devices" is highlighted,

pressing enter starts the settings app, at the devices page

Bluetooth & devices › Devices

Bluetooth
Discoverable as "YOGAHOME"

On ◉

Connect a new device to "YOGAHOME"
